

Use your **voice** to boost your **brain**

ATTENTION

SPEECH

MEMORY

ACTIVE SENSORY WORKOUT

Forbrain® is a unique **Speech and Brain Training Headset**. It helps your brain to better process information.

Speak while wearing Forbrain a few minutes per day to immediately improve learning and language skills.

PATENTED TECHNOLOGY

Forbrain® modifies the way you hear your own voice through a combination of two innovative technologies:

The Dynamic Filter enhances specific frequencies of speech. It constantly surprises the brain to increase memory, attention and sensory processing.

Bone conduction transmits your own voice via vibration of the ear pads placed in front of the ears. It gives you a natural and better quality perception of your voice.

What results is your speech is naturally adjusted to help improve your perception. Using Forbrain everyday gives the nervous system an excellent sensory workout.

BETTER SPEECH

Forbrain® enhances the fundamental sounds of spoken language by improving:

- Auditory Discrimination
- Phonological Awareness
- Sound Articulation and Fluency

“Forbrain® has had a significant increase in my patients’ self-discrimination of speech errors

Laura Calle
Speech-Language Pathologist

INCREASED ATTENTION

Forbrain® creates variations in voice perception, that put the brain in a state of alertness, increasing:

- Attention Span
- Sensory Integration
- Energy and Awareness

“It immediately helped during a school assignment as he could hear his own voice so well that he automatically started focusing

Rebecca Davis
Educator, ADHD Expert

BETTER MEMORY

Forbrain® highlights the rhythm of speech and enhances our ability to retain messages by helping to improve:

- Verbal Memory
- Focus and Concentration
- Reading and Writing

“Thanks to Forbrain, David is more calm and has made great improvements in speech and reading

Jude Frantz
Son with learning difficulties

SAFE AND EASY TO USE

All you need to do is to speak! You can use it alone or while working with someone else.

Use it at home 15 minutes a day for 6 to 10 weeks.

“Instead of relying on a series of incrementally more difficult exercises that the user must master, Forbrain is straightforward

ADDITUDE
MAGAZINE

For Children

Children love wearing Forbrain.

They feel like a rock star onstage. Homework, reading, and speaking efforts become fun and productive sessions. They learn much easier and much faster.

For Teenagers and Adults

Read a book or your lesson out loud; prepare for your exams, a presentation or an interview; even sing your favorite songs or chat with friends. Forbrain® helps you stay focused and integrate the information with ease.

For Seniors

Forbrain® is an excellent brain training program to maintain awareness, focus, and dynamism. Many seniors can't resist using it daily as they perceive their voice more clearly, and with greater sensitivity to its characteristics. After using Forbrain, some have even discovered new verbal hobbies like singing!

EVIDENCE-BASED TECHNOLOGY

Clinical research studies have proven that when Forbrain® is used, it creates an immediate positive impact on speech, as well as improvement in cognitive functions and learning.

Endorsed by experts

Thousands of clinicians and educators endorse Forbrain®. They are using it in many types of interventions including:

- **Speech-language Disorders**
(Speech delay, Apraxia, Aphasia...)
- **Sensory and Auditory Processing Disorders**
(APD / CAPD)
- **Attention Disorders** (ADD / ADHD)
- **Learning Disabilities** (Dyslexia, Poor reading, Poor memory, etc.)
- **Autism Spectrum Disorders**
(Autism, Asperger's Syndrome, Down Syndrome, etc.)
- **Brain injuries and brain diseases**

This list refers to the expertise of our affiliates who use Forbrain as a complementary tool to their treatment plans.

ABOUT US

For the last 20 years, we have been training thousands of Clinicians and Educators in the field of sensory integration. We have come to be the leader in developing professional technology for auditory and sound stimulation. Every year, our professional programs help more than 200,000 children and adults to develop their talents and potential.

Forbrain® is the first evidence-based technology which can be used by individuals at home. It has become the solid “bridge” in the gaps between sessions in practice and life at home.
